ESTEVE R&D: Pain Research and NME Drug Discovery

Strategic Joint Units in Pain NMEs:

- Alliance model that allows access to talent, know-how, technologies, capacities and infrastructures in Centers of Excellence
- The synergistic collaborative work focuses in ESTEVE Pain projects with real implication

Research Consortia for Pain Research and

NME Drug Discovery in Pain:

- KOLs and International Scientific Groups
- Current and future trends

Public Private Partnerships in non-pain fields:

- High unmet needs
- High societal impact

ESTEVE R&D

Network of Excellence:

➔ ESTEVE R&D Center in Parc Científic de Barcelona (University of Barcelona)

➔ Strategic Joint Units

- ICIQ (Institut Català d'Investigació Química)
- Universidad Santiago de Compostela

➔ Research Consortia:

- IMI : Europain + 5 horizontal projects
- EU FP7: NeuroPain

➔ Public Private Partnerships

Participation in IMI Projects

- ❑ **Europain:** *Understanding chronic pain and improving its treatment*
- ❑ **e-TOX:** *Integrating bioinformatics and chemoinformatic approaches for the development of expert systems allowing in silico prediction of toxicities*
- ❑ **Pharmtrain:** *Pharmaceutical Medicine Training Program*
- ❑ **EMTRAIN:** *European Medicines Research Training Network*
- ❑ **OpenPHACTS:** *The Open Pharmacological Concepts Triple Store*
- ❑ **EUPATI:** *European Patients' Academy on Therapeutic Innovation*

Total foreseen ESTEVE's contribution (2008-2017):
1,3 M Eur to projects + 0,6 M to IMI Office

Thank you!!
